

SAHIL KOUNDAL

DEVOPS ENGINEER

91-9307739598 | sahilkoundalwork2002@gmail.com | Pune,India

SUMMARY

AWS DevOps Engineer skilled in architecting and automating scalable, production-grade infrastructure using AWS services. Proven track record in designing and deploying efficient CI/CD pipelines with Jenkins and Terraform, achieving a 30% reduction in deployment times for fintech applications. Expertise includes cloud automation, monitoring tools like Prometheus and Grafana, and security best practices to ensure high availability and compliance. Committed to delivering innovative, reliable solutions that enhance operational efficiency and accelerate delivery cycles.

TECHNICAL SKILLS

- AWS Services: EC2, ECS (EC2/Fargate), VPC, IAM, API Gateway, CloudWatch (Metrics, Logs, Dashboards), Security Groups
- CI/CD & Automation: Jenkins, Ansible
- Monitoring & Observability: Prometheus, Grafana, Alertmanager, Blackbox Exporter, Node Exporter, JVM Exporter, New Relic
- OS & Scripting: Linux, Shell Scripting, Python (Basics)
- Infrastructure as Code: Terraform (modular architecture, reusable modules, remote state)
- Containers & Orchestration: Docker, Kubernetes, ArgoCD (GitOps)
- Security & Compliance: IAM Roles & Policies, Wazuh SIEM, PCI-DSS, RBI Audits
- Route 53 management

PROFESSIONAL EXPERIENCE

Pay10, DevOps Engineer

March 2024 - Present

- Managed AWS EC2 and ECS production environments with Route 53, ensuring high availability, scalability, security, and operational reliability.
- Designed and maintained Jenkins CI/CD pipelines integrated with Docker and Wazuh SIEM for automated build, security scanning, and deployment processes.
- Provisioned and automated AWS infrastructure using Terraform, including VPCs, ECS clusters, API Gateway, Load Balancers, and security groups.
- Implemented centralized monitoring and alerting using Prometheus, Grafana, Alertmanager, CloudWatch, New Relic, and Wazuh SIEM to improve infrastructure visibility and incident response.
- Optimized Docker images using multi-stage builds and best practices, reducing image size by approximately 50% and improving deployment performance.
- Led Disaster Recovery (DR) implementation by replicating critical infrastructure from Mumbai to Hyderabad region, enhancing business continuity and failover readiness.
- Coordinated and resolved security audit findings related to Internal VA/PT, External VA/PT, and Docker VAPT, ensuring timely vulnerability remediation and compliance closure.
- Automated infrastructure provisioning and monitoring deployments using Ansible, improving deployment consistency and reducing manual operational effort.
- Troubleshoot and optimized Jenkins multi-executor environments, ECS resource allocation, Linux ulimit configurations, and container performance to enhance platform stability and efficiency.

EDUCATION

AISSMS Institute of Information Technology, Pune, India

2019 - 2023

Bachelor of Technology (B.Tech)

Electronics And Communications Engineering

CERTIFICATIONS

- **AWS Certified Solutions Architect – Associate**
- **AWS Certified Cloud Practitioner**
