PROFESSIONAL SUMMARY

Data Engineer with 3 years of experience in building scalable data pipelines, optimizing ETL workflows, and executing end-to-end data migration projects. Skilled in Azure Data Factory, Azure Synapse Analytics, Informatica, and Snowflake, with strong proficiency in SQL and Python. Proven ability to enhance data processing efficiency, ensure data integrity, and support both real-time and batch data solutions. Strong background in data warehousing, cloud computing (Azure), and performance tuning, delivering reliable and high-quality data solutions aligned with business requirements.

TECHNICAL SKILLS

Programming & Query Languages : Python, SQL.

Cloud & Data Platforms Azure (Azure Data Factory, Azure Blob Storage, ADLS Gen2, Azure Synapse Analytics).

Data Engineering & Data Warehousing: ETL Development, Data Warehousing, Data Modeling (Star Schema & Snowflake Schema), Teradata.

ETL & Workflow Orchestration: Informatica PowerCenter, Azure Data Factory (ADF), SQL Server Integration Services (SSIS)

DevOps & CI/CD: Spinnaker, Bitbucket, Git, CI/CD Pipeline, Version Control, Release Management.

Monitoring & Scheduling : Azure Monitor, Control-M, Redwood Scheduler.

Data Visualization: Tableau.

PROFESSIONAL EXPERIENCE

Azure Data Engineer | Tech Mahindra Limited, India **Client:** Applied Materials India

Sep 2024 – Present

- Designed, developed, and managed end-to-end **Azure Data Factory (ADF)** pipelines, including Linked Services, Datasets, Pipelines, and Integration Runtime (IR), to securely migrate data from on-premises and cloud sources to Azure.
- Developed reusable, parameterized Azure Data Factory (ADF) pipelines to support scalable data migration across multiple environments, implementing **full and incremental data loads** using **watermark-** and timestamp-based strategies.
- Designed and optimized Azure Data Factory (ADF) **Copy Activities** and **Mapping Data Flows** to efficiently ingest, cleanse, transform, validate, and migrate large-volume datasets while enforcing business rules and maximizing pipeline performance.
- Configured **Schedule**, **Event-Based**, and **Tumbling Window Triggers** to automate data migration workflows while performing **data validation**, **reconciliation**, and quality checks to ensure accurate and complete data migration.
- Implemented robust **error handling**, retry mechanisms, logging, and proactive monitoring using Azure Data Factory Monitoring and **Azure Monitor** to ensure reliable pipeline execution and rapidly resolve migration issues.
- Implemented **Azure Key Vault** integration with Azure Data Factory to securely manage secrets and credentials, eliminating hardcoded credentials and strengthening data security across **Linked Services**.
- Collaborated with business stakeholders, solution architects, and database teams using Agile/Scrum methodologies to deliver migration projects on schedule.

Informatica ETL Developer | Tech Mahindra Limited, India **Client :** Cisco Systems, Inc.

Sept 2023 – Aug 2024

- Designed and developed ETL mappings using **Informatica PowerCenter** to extract, transform, and load data from **Teradata** and Oracle into the Enterprise Data Warehouse.
- Developed mappings using **Source Qualifier**, **Expression**, **Lookup (Connected & Unconnected)**, **Joiner**, **Aggregator**, **Router**, **Filter**, **Sequence Generator**, **Update Strategy**, **Union**, **Rank**, **Sorter**, **Normalizer**, and **Stored Procedure** transformations.
- Created and configured **Reusable Transformations**, **Maplets**, **Sessions**, **Workflows**, **Worklets**, and **Command Tasks** for reusable ETL development.
- Optimized mapping performance using Pushdown Optimization, Partitioning, Lookup Cache, Aggregator Cache, Session Tuning, Commit Intervals, and Bulk Loading techniques.
- Configured **Session Properties**, parameter files, pre-session/post-session SQL, workflow variables, mapping parameters, and recovery options.
- Implemented Incremental Loading, **CDC logic**, surrogate key generation, **SCD Type 1 & Type 2**, and data validation rules.
- Performed unit testing, dry runs, source-to-target validation, reconciliation, row-count verification, and defect fixing before production deployment.
- Monitored ETL jobs using **Workflow Monitor**, analyzed session logs, resolved workflow failures, and ensured successful production execution.
- Automated ETL deployments through **Spinnaker CI/CD**, promoting Informatica XMLs across Development, UAT, and Production environments.
- Used Informatica Repository Manager, Designer, **Workflow Manager**, Workflow Monitor, and RAC.

ACHIEVEMENTS/CERTIFICATION

- Azure Data Engineer Associate
- Snowpro core Certified.

EDUCATION

Master of Computer Applications (MCA) Gandhi Institute For Technology, Odisha CGPA: 8.60	Nov 2021 – July 2023
Bachelor of Science (B.Sc.) in Mathematics Pattamundai College, Odisha CGPA: 7.50	Aug 2017 – Aug 2020
